

For ViM editor

To exit the `vim` editor after editing a file, you can follow these steps:

1. **Press `Esc`:** This will ensure you are in normal mode (not in insert mode).
2. **Save and Exit:**
 - To save changes and exit, type `:wq` and press `Enter`. This writes the changes (w) and quits (q) the editor.
3. **Exit Without Saving:**
 - To exit without saving changes, type `:q!` and press `Enter`. The `!` overrides any warnings about unsaved changes.

Here is the sequence:

1. Press `Esc` to make sure you're in normal mode.
2. Type `:wq` and press `Enter` to save and exit.

or

1. Press `Esc` to make sure you're in normal mode.
2. Type `:q!` and press `Enter` to exit without saving.

For Nano GNU

To exit `nano` after adding text, you need to follow these steps:

1. ****Save Changes (if desired):****

- Press `^O` (Ctrl + O) to write out the changes to the file.
- Press `Enter` to confirm the filename and save the changes.

2. ****Exit `nano`:****

- Press `^X` (Ctrl + X) to exit the editor.

Here is the sequence:

1. Press `^O` (Ctrl + O).
2. Press `Enter` to save the file.
3. Press `^X` (Ctrl + X) to exit `nano`.

If you don't want to save the changes:

1. Press `^X` (Ctrl + X).
2. When prompted to save the changes, press `N` to discard changes and exit.
